1. Claims 1-43 are presented for examination.
2. Claims 1-43 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are indefinite because of the following claim language is not clear:

- a) "the category of internet site" in claim 1, line 5 lacks clear antecedent basis;
- b) "for controlling user access to categories of Internet sites..." in claim 1 and all other claims reciting this language is unclear and this language does not make any sense because a user does not request to access to categories of Internet sites. A user requests to access an internet site, e.g., a URL and the system checks that URL against a category of URLs and then performs whatever it wants to perform, block or allow or whatever. So it is not correct to say that user requested to access a category of Internet site. All claims should be overhauled under the light of this comment. Also, applicant should check all claims for any other antecedent basis problems and any other 112 second paragraph problems (e.g., see claim 30 for the problems with the language with "the responsiveness and "responsive".)

3. Prior art of record does not teach bandwidth management, e.g., determining data transfer rate along with the Internet access control according to category information. Claims would be allowable upon clearing of the second paragraph problems.
